

Labour Market Report

Centre for Skilled and Internationally Trained Professionals

Centre Update

The Bredin Institute is pleased to announce the opening of a Health Career Centre, within the Centre for Skilled and Internationally Trained Professionals. Health care professionals trained outside of Canada, including physicians, pharmacists, nurses, physiotherapists, dentists, and medical lab technologists, will be able to access enhanced services.

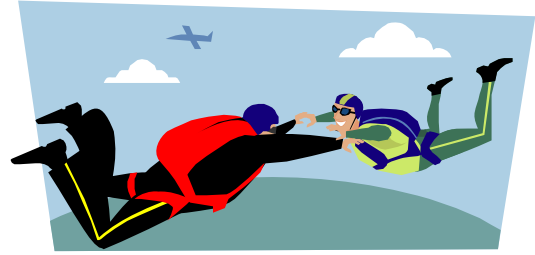

On top of the pre-employment workshops, exam study groups, and one-on-one licensure support, clients can also expect more occupation-specific seminars, clear speaking courses, and English language proficiency preparation classes.

Those interested in becoming a client should contact the Centre to book an appointment with our assessment officer today!
